

## PETRONAS HYDRAULIC PLUS SERIES

### Premium Performance Anti-wear Hydraulic Fluids

PETRONAS Hydraulic PLUS Series are premium performance anti-wear hydraulic fluids specially developed for a wide range of modern mobile and industrial hydraulic equipment operating under normal to extremely heavy duty conditions including latest high speed and high pressure systems. Formulated with the highest quality selected base oils enhanced with advanced anti-wear, anti-oxidant, anti-rust and anti-foam additives coupled with friction modifiers, PETRONAS Hydraulic PLUS fluids provide excellent anti-wear protection under toughest operating conditions and over 5x longer lasting performance\*.

PETRONAS Hydraulic PLUS Series meet or exceed key industrial specifications and OEM requirements including latest Bosch Rexroth RDE 90235 specification.

\*vs. minimum requirements of ISO 11158 HM for anti-wear hydraulic fluids based on TOST (ASTM D943)

#### Applications

PETRONAS Hydraulic PLUS Series are recommended for use in:

- various mobile and industrial hydraulic systems operating under normal to extremely heavy duty conditions
- modern hydraulic systems using high speed & high pressure pumps and operating under high temperatures
- hydraulic systems with smaller reservoirs & smaller coolers generating high thermal stress on hydraulic fluids
- sensitive to sludge and varnish formation systems with tight tolerance pumps and servo valves
- hydraulic systems demanding long life lubricants

#### Features and Benefits

Features	Benefits				
Low temperature protection	Ensures proper protection of equipment components during cold starts				
Excellent anti-wear protection	Protects equipment components from excessive wear and provides longer equipment life				
Excellent wet and dry filterability	Maintains excellent filter efficiency without giving rise to undue pressure drop, thus increasing filter lifetime.				
Excellent thermal and oxidation stability	Maintains performance levels under high temperatures and pressure, enabling long oil drain intervals				
Excellent rust & corrosion protection	Inhibits the corrosion process that occurs in presence of water, improving equipment life

### Premium Performance Anti-wear Hydraulic Fluids

Features	Benefits
Excellent water separability	Due to excellent water separability the system is protected from water degenerative effects, maintaining hydraulic system efficiency at required level and reducing maintenance costs
Excellent air release and foam stability	Maintains excellent efficiency in hydraulic systems, ensures smooth operation due to fast air release. Protects the system from air degenerative effects reducing maintenance costs
Excellent multi metal compatibility	Compatible with most metal alloys ensuring trouble free performance of the system
Excellent compatibility with most seal and elastomers	Compatible with most seals and elastomers, which prevents oil leaks and contamination due to seal erosion
